DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group iii, directed to claims 3-12, in Paper No. 7 is acknowledged.
2. Claims 1 & 2 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

4. Applicant has indicated co-pending applications in the first paragraph of the specification. The first page of the specification should be updated to clarify the status of all related applications noted in the first paragraph of the specification. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. _____" should follow the filing date of the parent application. If a parent

application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 3-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Divino, Jr. et al. (6,602,467). Divino, Jr. (hereafter Divino) discloses a liquid-to-liquid blood oxygenation apparatus for oxygenating blood and delivering said oxygenated blood to a patient. The apparatus has a pump assembly (600) connected to a patient for withdrawing blood and delivering the blood to an oxygenation assembly (600) coupled to said pump. The oxygenation assembly has a housing (610) defining a mixing chamber (612), a blood inlet, a blood outlet and an oxygen-supersaturated fluid supply inlet. A return tube (660) delivers the oxygenated blood back to the patient. Divino also teaches that the blood enters the mixing chamber in a vortical flow direction in the mixing chamber and that the chamber may be pressurized. Divino teaches that the oxygen-supersaturated fluid is a physiologic solution, such as saline and that the oxygenated blood may be hyperoxic or hyperbaric. The apparatus also has a control

assembly and a display coupled to the control unit. See figures 6 & 7; col. 23, line21-
col. 24, line62.

Double Patenting

6. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 3-12 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 3-12 of copending Application No. 10/384,301 (Pub. No. 2003/0215356 A1). This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spears et al., Myrick, Grady, Johnson et al., and Damann all disclose liquid-to-liquid blood oxygenation assemblies.
